Chapter 14 Anatomy and Physiology Flashcards - Quizlet

Ch. 14 Introduction - Anatomy and Physiology | OpenStax. Figure 14.1 Too Hot to Touch When high temperature is sensed in the skin, a reflexive withdrawal is initiated by the muscles of the arm. Sensory neurons are activated by a stimulus, which is sent to the central nervous system, and a motor response is sent out to the skeletal muscles that control this movement.

Ch. 14 Introduction - Anatomy and Physiology | OpenStax

14.1 Sensory Perception. The senses are olfaction (smell), gustation (taste), somatosensation (sensations associated with the skin and body), audition (hearing), equilibrium (balance), and vision. With the exception of somatosensation, this list represents the special senses, or those systems of the body that are associated with specific organs such as the tongue or eye.
