Definition. The ICAO Aerodrome Reference Code is a two part categorisation of aircraft types which simplifies the process of establishing whether a particular aircraft is able to use a particular aerodrome. It is included in ICAO Annex 14. It has two 'elements', the first is a numeric code based on the Reference Field Length for which there are four categories and the second is letter code ...

FIELD REFERENCE GUIDE - Baroid

The format of "A Field Guide to Airplanes" will be familiar to birdwatchers, as the authors have taken the style of Peterson's famous identification guides and applied it to aircraft. There's nothing terribly original in this, as Peterson himself worked with the military in World War II to develop spotter's guides based on the principles he developed.
