Linux Shell Scripting with Bash: Burtch, Ken O ...

The bash (Bourne-Again Shell) is the default shell in most of the Linux distributions and OS X. It is an open-source GNU project that was intended to replace the sh (Bourne Shell), the original Unix shell. It was developed by Brian Fox and was released in 1989. You must always remember that each Linux script using bash will start with the following line: `#!/bin/bash`. Every Linux script starts with a shebang (`#!`) line.

Shell Scripting Part I: Getting started with bash scripting

Shell scripts are plain text files that contain a sequence of commands that are run by a shell, one after another. Bash is the default shell in most modern Linux distributions and we will leverage its programming capabilities to create simple scripts. As we gain experience, we can use what we have learned to develop more robust programs.

Shell Scripting With Bash For Linux Administration - Part ...

Bash Shell Scripting Definition Bash Bash is a command language interpreter. It is widely available on various operating systems and is a default command interpreter on most GNU/Linux systems. The name is an acronym for the 'Bourne-Again SHell'. Shell Shell is a macro processor which allows for an interactive or non-interactive command execution.

Bash Scripting Tutorial for Beginners - LinuxConfig.org

Each script starts with a "shebang" and the path to the shell that you want the script to use, like so: `#!/bin/bash`. The "`#!`" combo is called a shebang by most Unix geeks. This is used by the shell to decide which interpreter to run the rest of the script, and ignored by the shell that actually runs the script. Confused? Scripts can be written for all kinds of interpreters — bash, tsch, zsh, or other shells, or for Perl, Python, and so on.

Writing a Simple Bash Script - Linux.com

Bash scripts can be used for various purposes, such as executing a shell command, running multiple commands together, customizing administrative tasks, performing task automation etc. So knowledge of bash programming basics is important for every Linux user.
