one of the processes used to break down compounds into simpler substances. Chemical Symbol. Each element is represented by a one- or two- letter chemical symbol, the first letter of a chemical symbol is always capitalized, when a second letter is ...

Chemistry Chapter 2 Matter and Change Flashcards | Quizlet

- All matter can undergo physical and chemical changes
- Physical change – occurs when a substance alters its state (phase change), but does not change its chemical composition – E.g. Grinding, cutting
- Phase change – transition of a substance from one state to another – Depend on temperature and pressure

THE PROPERTIES AND STRUCTURE OF MATTER

This is a compact book with lots of chemistry problems, and an answer key. It's part of a series ("Chemistry: Matter and Change")--after I ordered it, my Amazon recommendations filled up with what seemed to be a couple dozen associated books. But this book doesn't require any of the others. It's high-school level and perfect for a review of basics.
