### Consumer Home | Milton

Milton sterilizing fluid is produced by Procter & Gamble for sterilization uses. It contains 1% sodium hypochlorite (NaClO) and 16.5% sodium chloride (NaCl; common salt). 1:80 dilution is used to sterilise babies' feeding utensils, including baby bottles. It is sold in dissolvable tablets which are then mixed with cold water and placed in a lidded bucket.

### Milton sterilizing fluid - Wikipedia

Preparation: Add 50 ml (2 1/2 capfuls) of the Milton Solution per 4 litres of clean cold water (1:80 ratio) into the Milton Method Unit or suitable plastic container. After squirting made-up solution through the teat holes, completely immerse all items, covering items with the white submerged plate or a china plate to eliminate air bubbles.
