So here's my problem. I own a dewalt pressure washer with a 13 hp Honda GX 390 engine. It was all serviced and worked well last summer. Kept in my garage, seafoam stabilizer in it. It starts but shuts off right away or stays on for 30 or so seconds and then shuts down... i check the oil and it pours out when the cap is removed.

Honda GX390 engine problems (pressure washer)

Problem solved Oil and filter change, Spark plug, and float valve checked and replaced, cut. ... I picked up 2 honda gx390 13hp engines from a storage sale. One is a pull start and one is a electric start. Both start easy and run until i 3/4 to full throttle them; both die.

Honda GX390 wont stay running Looking at a friends pressure washer which has a 13 HP GX390 engine on it. Seems to have good spark but it will only start and run for ~1 minute and then it shuts off like someone hit the kill switch. Carb looks OK, tip cleaner fits into all the orifices.

Honda GX390 wont stay running - TractorByNet

Check the oil level in the pump and the engine before every use. If the engine does not turn at all, pull the spark plug and pour some Marvell miracle oil in the cylinder and let it soak for a day or two. After that, try to pull the cord with the spark plug still removed and the gun trigger depressed. It should rotate easily.
