10Chapter 2 Discrete-
Time Signals and
Systems Signal-
processing systems
may be classified along
the same lines as
signals. That is,
continuous-time
systems are systems
for which both the
input and the output
are continuous-time
signals, and discrete-
time systems are those
for which both the

for Discrete time ...

A discrete-time system is a device or algorithm that, according to some well-defined rule, operates on a discrete-time signal called the input signal or excitation to produce another discrete-time signal called the output signal or response. Mathematically speaking, a system is also a function.
