Sexuality education delivered within a safe and enabling learning environment and alongside access to health services has a positive and life-long effect on the health and well-being of young people. Studies in several European countries -

SEXUALITY EDUCATION - World Health Organization

Comprehensive sexuality education (CSE) plays a central role in the preparation of young people for a safe, productive, fulfilling life in a world where HIV and AIDS, sexually transmitted infections (STIs), unintended pregnancies, gender-based violence (GBV) and gender inequality still pose serious risks to their well-being.

WHO | International technical guidance on sexuality education

Sexuality education has positive effects, including increasing young people's knowledge and improving their attitudes related to sexual and reproductive health and behaviors. Sexuality education – in or out of schools – does not increase sexual activity, sexual risk-taking behaviour or STI/HIV infection rates.

Why comprehensive sexuality education is important

Whilst sex education often gets a bad rap for using scare tactics to try to prevent STIs and teen pregnancy, a more positive, open approach is favoured by many young people and sexual health experts. Masturbation and casual sex should be included in RSE in order to reflect the kinds of relationships and sexual experiences of many young people.

What young people really want from sex education | Patient

All young people deserve high-quality sex education and sexual health care, yet not all of them have access to these vital resources. The current landscape of sexual health for young people has been shaped by years of stigma around adolescent sexuality and the Trump administration's dismissal of young people's sexual health needs. However, Congress has the ability to make sexual health information and services more accessible for adolescents and young adults.

It's Time for Congress to Give All Young People the Sexual ...

Using qualitative data, this paper focuses on what participating young people thought was necessary to improve the quality of sexuality education. Participants suggest that current forms of sexuality education are too clinical, didactic and unengaging, and are missing in relevant content.
